Overview

NumerCon and the time I spent with my fellow Numeratis were the exact "booster jab" I needed to wake the "meetup organizer Joe" up after two crazy years of COVID and hibernation in a man cave. After NumerCon, I am confident that 1) many countries are now ready for in-person tech events and 2) we need to bring this fantastic in-person experience to more Numeratis around the world.

So, fam, here is my proposal for **Global Numerai Community Meetups**.

Goals

- **Demystifying Numerai** - many top data scientists out there are just not too sure about the crypto elements and/or the tournament format. Speaking with and listening to long-term participants can be an effective way to build trust. This was exactly how I learned to trust Numerai after watching Jon's Office Hours with Arbitrage.
- **Knowledge sharing and brainstorming** - although we may not share all our secret sauce, meetups are great opportunities to bounce ideas off each other and may lead to new models with crazily high TC.
- **Face-to-face discussions between Numeratis and Numerai team** - a lot more than just asking the team "wen scores" in person, these events can provide a quick and direct feedback loop for both participants and the Numerai team.

Specifications

- Main objective - **meetups** with talks from community members + the participation of CoE and/or Numerai team members
- Secondary objective - **workshops**
- Nice to have - **mini unconferences** (see Unconference - Wikipedia)

Numerai Meetups Proposal

How It's Going
