

A decorative graphic on the left side of the slide consisting of two overlapping parallelograms. The front one is blue and the back one is a light green. They are positioned diagonally, with the blue one partially covering the green one.

My Journey from Web2 to Web3

By: Aventurine

Background

- US Military out of high school from 2006-2015
- Transitioned to Medical Lab Science and got licensed in CA
- After a couple years due to licensing restrictions based on CA laws transitioned to becoming a medical lab field engineer for an instrumentation company specializing in clinical chemistry and immunochemistry instruments
- While working in the lab field became interested in finance and investing
- Started personally trading stocks and options and began BS degree in finance part time while working around 2016-2017. Also traded crypto briefly in 2017-2018 during the hype. Joined as an analyst in a student managed stock fund
- 2019 in my final semesters got scholarship for CFA licensing testing
- 2020 In person graduation and CFA testing shut down due to covid
- Mid 2020 found Numerai!

My Numerai Journey

Numeraire (NMR)

Numeraire (NMR) is a cryptocurrency that powers Numerai, a San Francisco-based hedge fund that crowdsources artificial intelligence to make investments in major stock markets around the world. NMR holders can stake their NMR tokens every week on specific predictions. Successful predictions are rewarded with more NMR.

- COVID put a stop to my journey in finance. During the bottom of the markets was buying heavy back into stocks and got back into crypto
- When NMR was listed on Coinbase was when I was first made aware of the project.
- A token powering a hedge fund caught my eye as someone who was trying to enter the finance world
- I had no data science knowledge but knowledgeable about how to code from high school and some upper division college courses
- Getting ACTIVELY involved with the Numerai community was my first stepping stone in crypto after being only a fairly passive trader

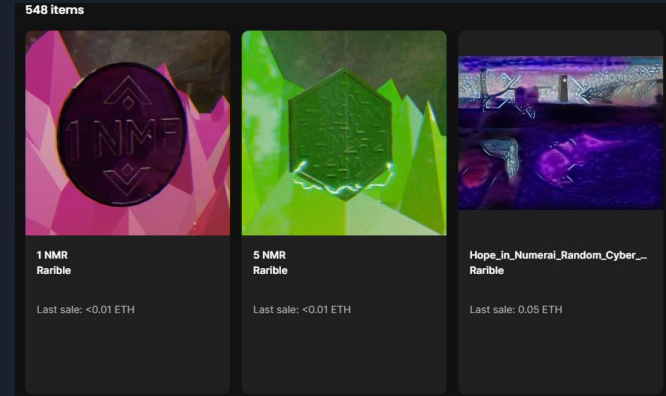

Data Science from Scratch-How getting involved with the Numerai community helped me succeed

- Numerai website- The Numerai Docs on the website was a great starting point for me. This along with links to some example notebooks got me the basic structure of what I needed to research
- RocketChat- RocketChat was where a lot of the magic happened. Everyone from the Numerai community was so welcoming and anytime I had questions, someone would point me in the right direction
- Daily Twitch Streams during Covid Lockdowns with Arb- Daily place for members of the community to chill and ask questions
- Numerai Forums-A large stream of knowledge in one space
- Books
- Example Model
- Trial and Errors- I spent several months testing models before staking and I started with low stake

Continued

- Initial model started to perform well. Increased stake towards at end of 2020.
- First lengthy discussions on NFTs took place around Mar of 2021 with Beeples
Everyday sale for 69M
- First NFTs from Numerai Community Apr 2021
- CoE formed by July 2021
- Started collecting Top Shots NFTs
- Continued to stay active with Numerai
- Started attending parties and Numer Con
- HB Started selling models as NFTs

Joining the CoE

- HB decided to step down from CoE in Dec 2021
- I volunteered to replace and was voted in
- First year for CoE was great

Between Mar and July of 2021, the CoE was formed with members arbitrage, jrb, jrAi, hb, themicon, uuazed and suajp. 100k USD in NMR was sent to the multisig. hb in Dec 2021 voluntarily stepped down and I volunteered as a replacement.

The past year been pretty amazing. Here is a list of what has been accomplished so far:

- ☐ Reimbursements were sent for multisig wallet setup and gas costs.
- ☐ A proposal by hb for a Kashi Lending/Borrowing Tutorial was taken up by jorijnsmit
- ☐ A proposal by restrading was submitted for something many people inside and outside the tournament has asked for continuously over Numerai's existence... A Numerai Community Marketplace for the buying and selling of models and prediction files. This became Numerbay.ai
- ☐ A proposal by jorijnsmit was created and funded to submit a portion of NMR from the multisig for Kashi/Sushiswap liquidity. 200 sent for "cook" on 06/27/21 and 50 returned back to fund projects on 07/21/21
- ☐ User liz was sent initial funding for supporting signals submission development in R and streamed everything live on Twitch. liz will also be working on the github to create more example models in R.
- ☐ A proposal for starting a CoE sponsored monthly newsletter by Aventurine was approved and initial funding sent
- ☐ Opensignals funding to jrdi
- ☐ Youtube series funding to malding for a Numerai Tutorial Series
- ☐ Community Reviews for Small Retroactive bounties: OF_S for code contributions to help R users download data and submit on V3 massive dataset, NMR/USD script for main Numerai Site, Payment's dashboard and A True Contribution Backtest (High Quality Data Science post)

Falling in Love with Crypto/Web3

- By the end of 2021 I was getting more and more active in the NFT space buying and getting active with communities.
- Started to attend IRL meetups when they started to become more common after COVID restrictions let up
- Went to Numerai parties and Numercon
- Was writing monthly newsletters for the Numerai community and hosting CoE spaces on Twitter
- Fell in love with everything about crypto and web3 and decentralization
- Early 2022 was when I decided I want to do something in the space full time

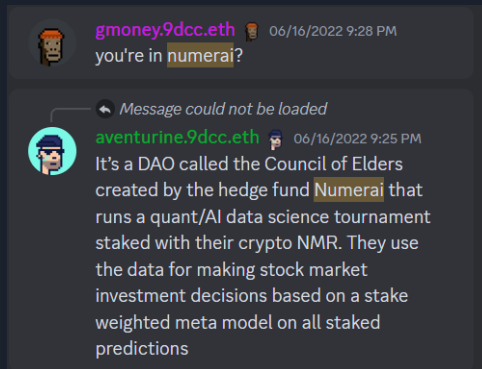

Skills learned from the Numerai Community and becoming a CoE member

- Working in a team
- Controlling a multisig
- Getting the pulse of the community for what they want to see built
- Assisted in getting community proposals funded
- Marketing
- Increased social media usage
- Hosting events
- Speaking in public and online(spaces/discord/clubhouse)
- Project management

How the idea of the CoE actually got me my first job in web3

STORY TIME

Bear market blues-How it took me a year to leave my web2 and learnings

- The crypto/NFT bear market started just as I was wanting to move into the space throughout 2022
- Too much competition for “full time” positions
- Countless resumes sent in to small NFT communities to large crypto companies like coinbase, moon pay and more...no call backs
- DONT GIVE UP- Staying active in the crypto and web3 space and no slowing down built trust over time
- NETWORK, NETWORK, NETWORK
- As most companies are running lean, contract work is the way to go
- Stack contracts
- Start LLC consulting company Aventurine Labs LLC

Conclusion

- Don't give up
- Be Active
- Help out for free...at first
- Network as much as possible
- Sacrifice certain things like time and money to get your name out there
- Don't give up
