

About Us

Numerai

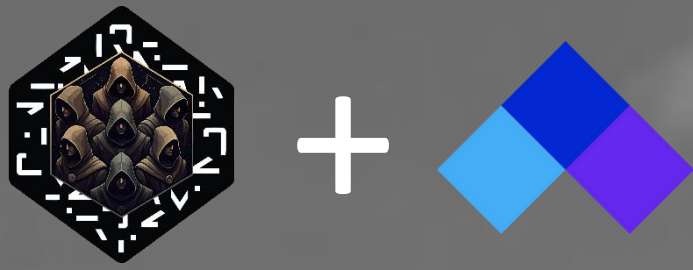

Is an AI-driven hedge fund in San Francisco that crowdsources stock market predictions from global data scientists.

Numerai Council of Elders

is a community-elected group of seven members managing a multisig wallet funded by Numerai to support ecosystem initiatives.

YIEDL.ai

is a decentralized marketplace that utilizes over 1,000 data scientists competing in AI tournaments for crypto rewards, enabling data-driven investment decisions.

How It Started

Tokyo Meetup

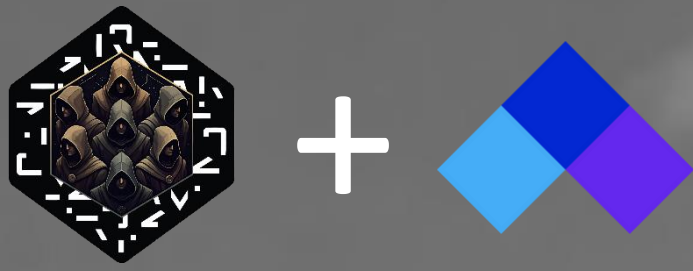

As I planned to expand the Numerai meetup universe, I invited YIEDL.ai, Flock.io, and CrunchDAO to present at our Tokyo meetup back in July.

First Discussion

After a few boxes of sushi, Davide mentioned the YIEDL crypto dataset, which has tons of features.

Huge Potential

The potential for this data to enhance Numerai Crypto was evident, and Joe decided to investigate further.

Bridging the Gap

Numerai Crypto

A data science competition based on 30-day returns from crypto assets requires participants to create their **own data pipelines to generate predictive features**. This is where the YIEDL crypto dataset can effectively bridge that gap.

YIEDL's Crypto Data

The YIEDL crypto dataset is an extensive collection that spans over a decade of cryptocurrency data, incorporating elements such as price, volume and market cap (PVM), sentiment analysis, and on-chain metrics.

Enhancements by YIEDL's Data Engineering Team

Daily Data Refresh

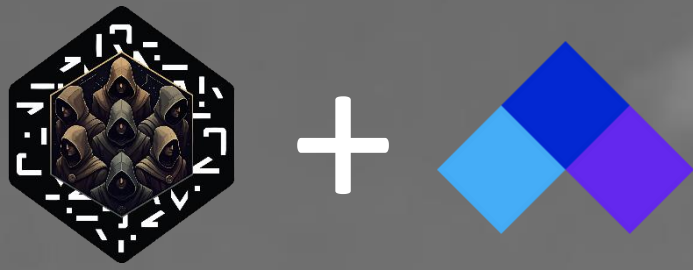

Matching the submission frequency of Numerai Crypto is one key request from the Numerai community.

API

This allows for full automation and leads to wider adoption within the Numerai community.

Approved and Included in Numerai's Docs

This is a great sign of a successful collaboration!

Resolved Rounds

Promising Early Results from Joe's Baseline Models

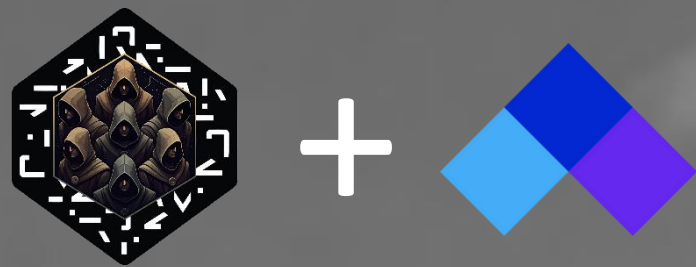

YIEDL-Powered Predictions

I have been battle-testing the YIEDL crypto data by submitting predictions to the live competition. All my models were trained using only the YIEDL data.

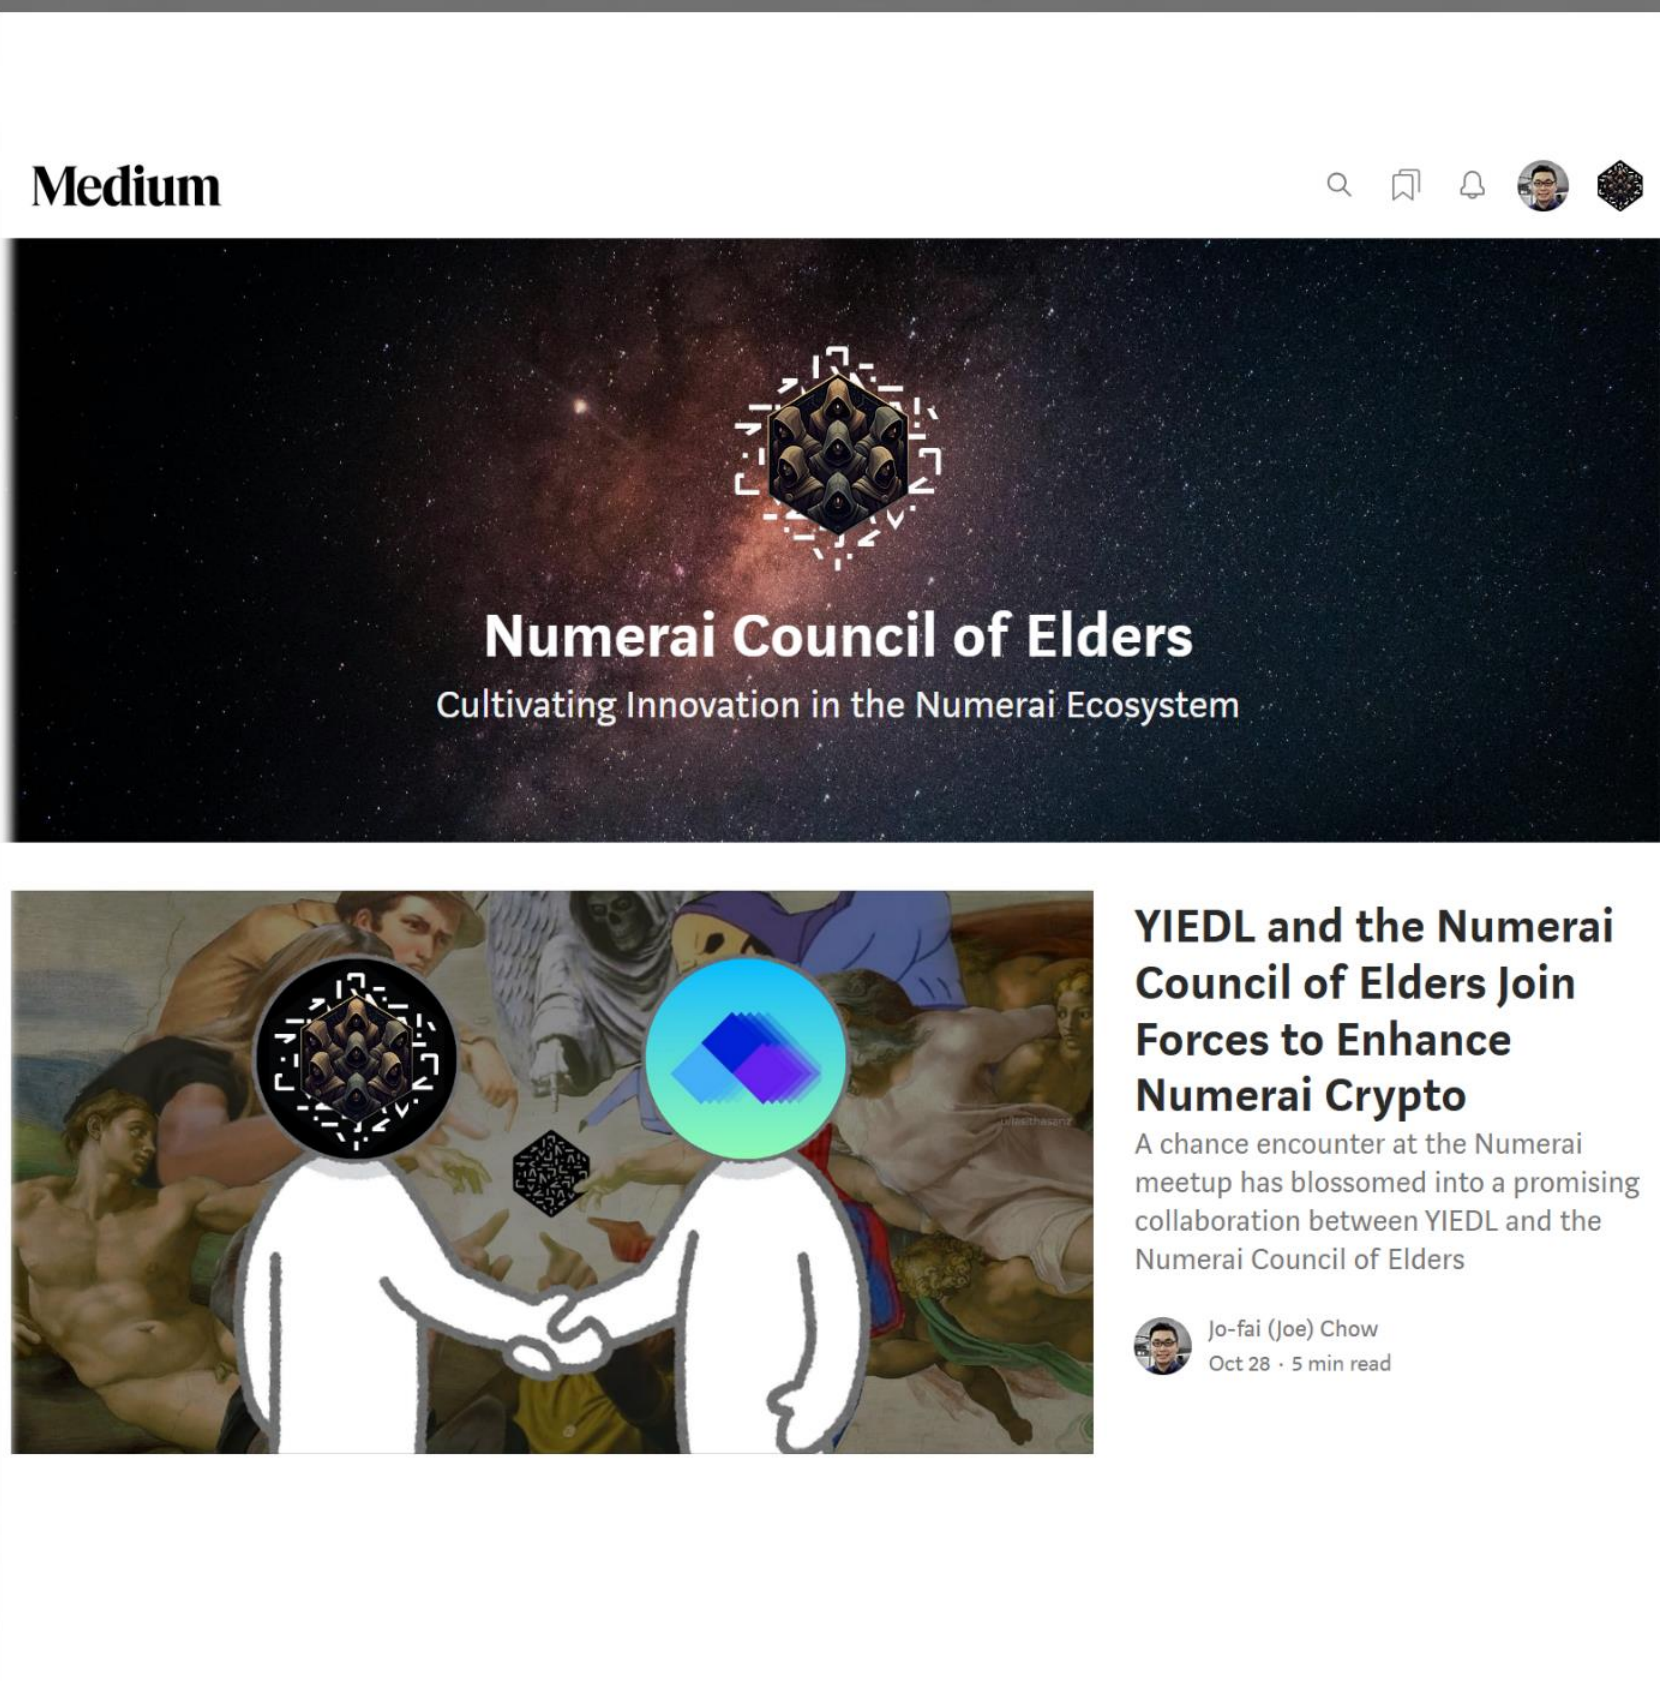

ALL VERY GREEN

In degen terms, I have been seeing some **god candles!** All my resolved and pending results to date have been positive (based on Numerai's metrics).

Moving Forward

Joe YIEDL Data Science Council

The crypto data collaboration between NumeraiCoE and YIEDL was a great success. I have decided to join the YIEDL Data Science Council in order to work closely with both Numerai and YIEDL. I look forward to **more win-win collaborations**.

Acknowledgement

We (NumeraiCoE) would like to thank the YIEDL team again for their hard work and continuous effort in providing such invaluable dataset for the Numerai community.
