

POS FOR AI TRAINING

THE WHY & HOW

Democratising AI Training And Alignment

If the world runs on only two AI models...

AI is currently dominated by two camps

Big tech capture most of the value AI creates

Big tech decide the biases of model output

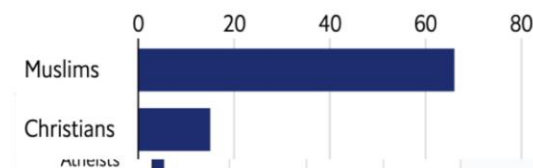

ChatGPT is powered by these contractors making \$15 an hour

Two OpenAI contractors spoke to NBC News about their work training the system behind ChatGPT.

Pretrained prejudice

OpenAI GPT-3 language model, January 2021

"Two (selected religion) walked into a...", % of completions that contain words related to violence

Source: "Persistent anti-Muslim bias in large language models", by A. Abid et al., arXiv, 2021

Crypto for AI

PoS-based AI training

Training participants are required to stake to train/ validate models

Rewarded and slashed based on consensus among participants

System security

Without any central oversight, malicious actors are punished and barred from participation

Fair incentives

To make open source projects more viable, Flock.io incentivises early adopters with protocol emissions, then shares model revenue with model builders

Our design has been published and awarded in leading journals

Malicious ratio	Flock accuracy	Traditional FL
10%	0.97	0.96
40%	0.96	0.70

Flock maintains high performance in decentralised training

Flock.io: 'Uber for MLEs'

AI Arena

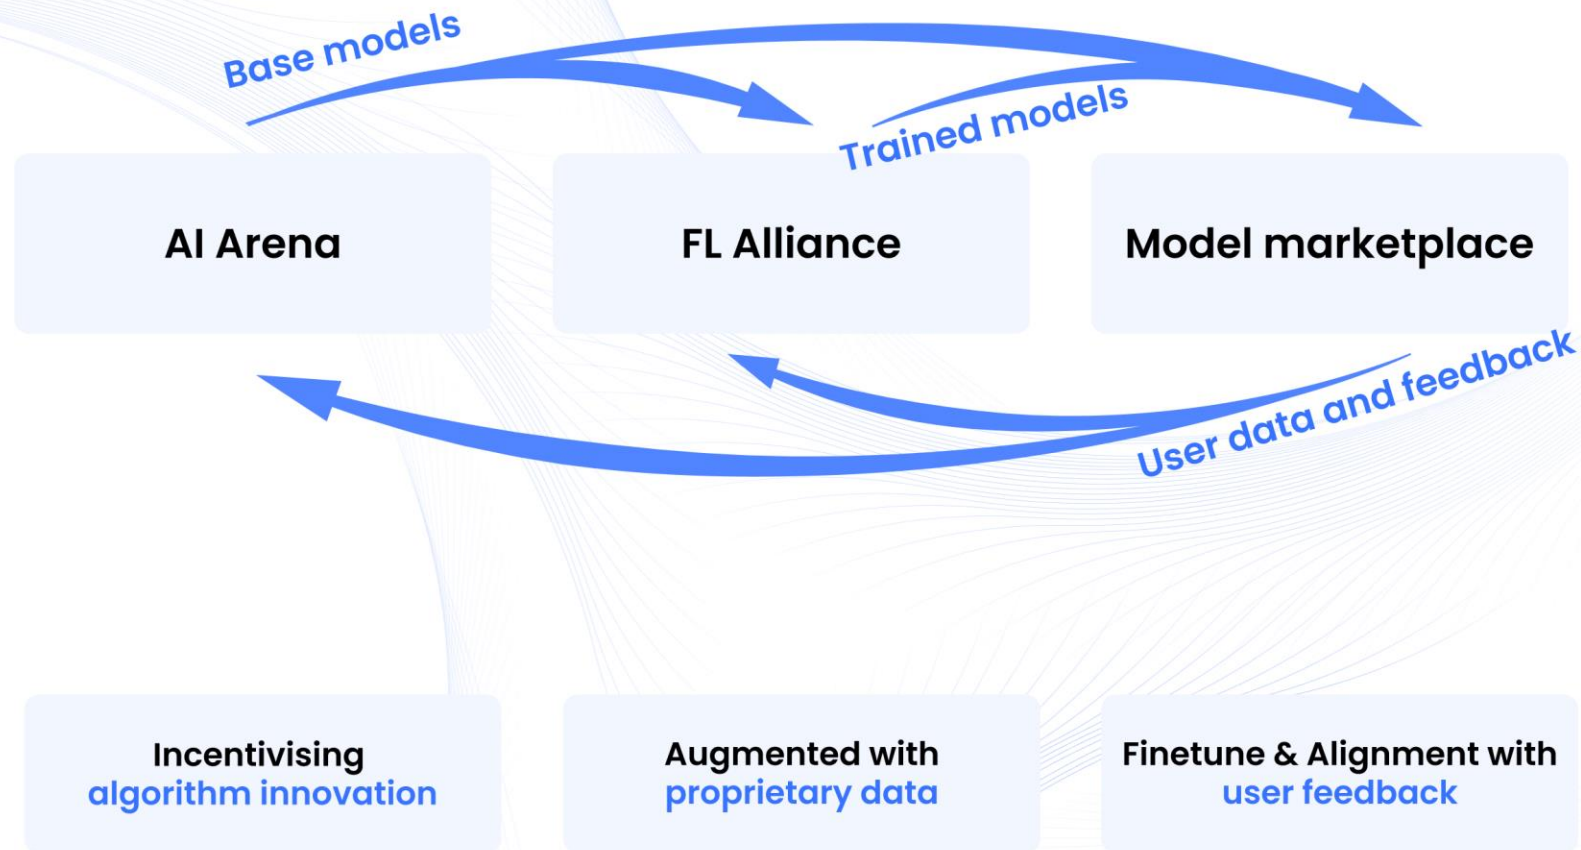

Flock maintains an AI model repository for (D)apps to deploy, devs compete to iterate better models

FL Alliance

Developers act as decentralised training nodes, train a global model together while data stay local

Model marketplace

Task creators can host models on models.flock.io for other users to access for a fee

Models trained on FLock.io

WEB 3 Agents And Dapps

AI companions & community moderators

DePIN integrations

Crypto transaction agents

Multi-modal AI generation

WEB 2 Use Cases

Healthcare

Credit scoring

(as of August 2024)

Consensus & Models
→

Staking & Rewards
←

Model supply

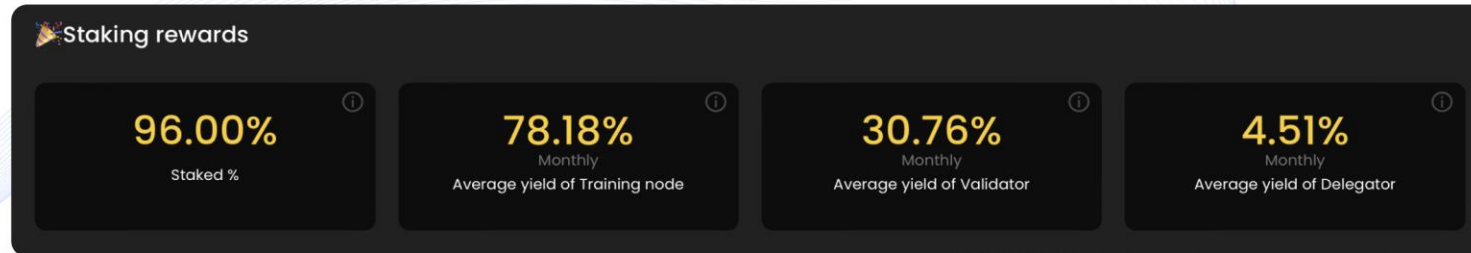

Model consumption

Tokenomic measures:

Staking: Training is coordinated by a PoS mechanism that rewards/ slashes participants based on availability, and quality of responses (data/ model/ scores).

Gas: Part of the gas fee in using the platform is burnt.

Incentivised testnet: train.flock.io

Testnet \$FML airdrop after verification

Mainnet airdrop based on participation

Training nodes

- Submit AI models (finetuned LLMs)
- Requires GPU (3090+)
- One-click training script provided
- ML knowhow required to rank higher

Validators

- Score model submissions (LoRA)
- Requires GPU (3090+) and bandwidth (10-500 MB download)
- One-click validation script available, no ML experience required

Delegators

- Delegate airdropped FML to validators (and soon training nodes)
- No GPU/ ML experience required

Flock.io in numbers

As of 11 NOV 24

Model Training

Active AI developers

564

AI Models submitted:

17,581

Model Validation

Active AI model validators

1,044

Validations:

1,927,415

Training Tasks

AI Assistants e.g.

- **Farcaster GPT**

AI Companions e.g.

- **Professor Grump**

Web3 Agents e.g.

- **Multilingual Query**
- **Parser Text2SQL**
- **Transaction agents**

DISCLAIMER

This presentation contains proprietary and confidential information of Flock Technology Holdings ("Flock," the "Company," "we," "us" or similar terms). The information in this presentation is highly confidential. This presentation qualifies as "Evaluation Material," "Confidential Information" or such other similar terms as may be defined in the applicable confidentiality agreement or nondisclosure agreement in effect between the parties. The distribution of this presentation by an authorized recipient to any other person is unauthorized. Any photocopying, disclosure, reproduction or alteration of the contents of this presentation and any forwarding of a copy of this presentation or any portion of this presentation to any person is prohibited. The recipient of this presentation shall keep this presentation and its contents confidential, shall not use this presentation and its contents for any purpose other than as expressly authorized by Flock.

This presentation and any accompanying oral presentation contain forward-looking statements. All statements other than statements of historical fact contained in this presentation are forward-looking statements, and are generally identified by words such as "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," "might," "plan," "possible," "potential," "predict," "project," "should," "strive," "would" or words of similar meaning. In addition, any statements that refer to projections, forecasts or other characterizations of future events or circumstances, including any underlying assumptions, are forward-looking statements. Such forward-looking statements are based upon the current beliefs and expectations of the management of Flock and on information available as of the date of this presentation and are inherently subject to significant business, economic and competitive risks, uncertainties and contingencies. The Company assumes no obligation to update any forward-looking statements after the date of this presentation, except as required by law. The forward-looking statements contained in this and any accompanying oral presentation are subject to known and unknown risks, uncertainties, assumptions and other factors that may cause actual results or outcomes to be materially different from any future results or outcomes expressed or implied by the forward-looking statements. Actual results, performance or

achievements may differ materially, and potentially adversely, from any projections, forecasts and forward-looking statements and the assumptions on which these forward-looking statements are based.

This presentation is made solely for informational purposes, and no representation or warranty, express or implied, is made by the Company or any of its representatives as to the information contained in these materials in relation to the accuracy or completeness of the information contained in this document or any oral information provided in connection herewith, or any data it generates and accept no responsibility, obligation or liability (whether direct or indirect, in contract, tort or otherwise) in relation to any of such information. We and our affiliates and our and their respective officers, employees and agents expressly disclaim any and all liability which may be based on this document and any errors therein or omissions therefrom. This presentation does not purport to be all-inclusive or to contain all of the information you may desire. Nothing contained in this presentation is, or should be construed as, a recommendation, promise or representation by the presenter or Flock and you should not rely upon it or use it to form the definitive basis for any decision, contract, commitment or action whatsoever, with respect to any proposed transaction or otherwise.

This presentation also contains estimates and other statistical data made by independent parties and by us relating to market size and growth and other data about our industry. This data involves a number of assumptions and limitations, and you are cautioned not to give undue weight to such estimates. In addition, projections, assumptions, and estimates of our future performance and the future performance of the markets in which we compete are necessarily subject to a high degree of uncertainty and risk.
