

Numeroo

Distributed Compute for Numerai

From your first click to your first submission

numeroo.bot

What is Numerai?

Numerai is the world's largest AI-run hedge fund — crowdsourced from thousands of data scientists.

 Weekly tournament rounds — new data released every Saturday

 Participants build ML models that predict stock returns

 Top performers earn real money, staked via NMR tokens

 Anyone can join — from Wall Street quants to bedroom coders

The challenge: Traditionally, participating required Python expertise, cloud infrastructure, and hours of manual work every week.

What is Numeroo?

Numeroo removes the barriers to Numerai participation — for everyone.

Automated Data Downloads

New round data fetched automatically — no manual steps.

Model Training & Tuning

Distributed workers train your models fast. Optuna tunes them smarter.

Submission Management

Predictions uploaded to Numerai automatically. Zero intervention.

Live Monitoring

Track corr, sharpe, and submission status across all models in real time.

Why Numeroo?

Increase demand for NMR -> Increase NMR price

Increase Awareness of Numerai

Make more people aware of numer

Reduce Barriers to entry

Distributed workers train your models fast.
Optuna tunes them smarter.

Handle the infrastructure

Allows datascientists to focus on building models not worrying if they managed to submit on time or not

Everyone profits

More users, more demand, more rewards,
more sharing

Three Paths to Alpha

Pick your path — Numeroo meets you where you are.

Beginner

No code required

Who: Non-technical users, finance professionals, curious newcomers

First Numerai submission in under 10 minutes — just a few clicks.

[Get Started →](#)

Intermediate

Full infrastructure control

Who: Data scientists, Python developers, ML practitioners

Automate pipelines, tune hyperparameters, distribute training across workers.

[Automate Now →](#)

Advanced

Build, optimise & monetise

Who: ML engineers, researchers, algorithm designers

Custom models, full API access, and sell signals/models via NumerBay.

[Build & Sell →](#)

BEGINNER

No Code. No Servers. No Stress.

For finance professionals, curious newcomers, and anyone who wants Numerai exposure without the technical overhead.

1

Sign Up & Connect

Create your Numeroo account and paste your Numerai API key — takes 2 minutes.

2

Choose a Model

Select a pre-built model (LightGBM, LSTM) from the library with one click.

3

Deploy

Numeroo detects new rounds automatically and trains your model on fresh data.

4

Submit & Monitor

Predictions uploaded to Numerai automatically. Watch your corr score live.

"I got my first Numerai submission without writing a single line of code."

 INTERMEDIATE

Infrastructure Without the Headaches.

For data scientists and Python developers who know their models — but want to automate everything else.

Pipeline Automation

Define once, run every tournament round. No cron jobs, no bash scripts.

Distributed Training

Spread compute across worker nodes. Parallel training cuts wall-clock time dramatically.

Hyperparameter Tuning

Optuna integration built-in. Automated search finds your best config.

Experiment Tracking

Version control for every model run. Compare, promote, roll back.

Multi-account Support

Manage multiple Numerai slots from a single Numeroo dashboard.

Real-time Monitoring

Live corr, sharpe, and feature exposure across all models.

Build. Optimise. Monetise.

For ML engineers and researchers who want full control — and a path to monetise their alpha via NumerBay.

Any Model Framework

LightGBM, LSTM, XGBoost, PyTorch, scikit-learn — bring whatever works.

Full Pipeline API

Hook into every stage: data load → train → predict → submit.

Parallel Optuna Search

Hyperparameter search distributed across workers — find optimal configs fast.

NumerBay Integration

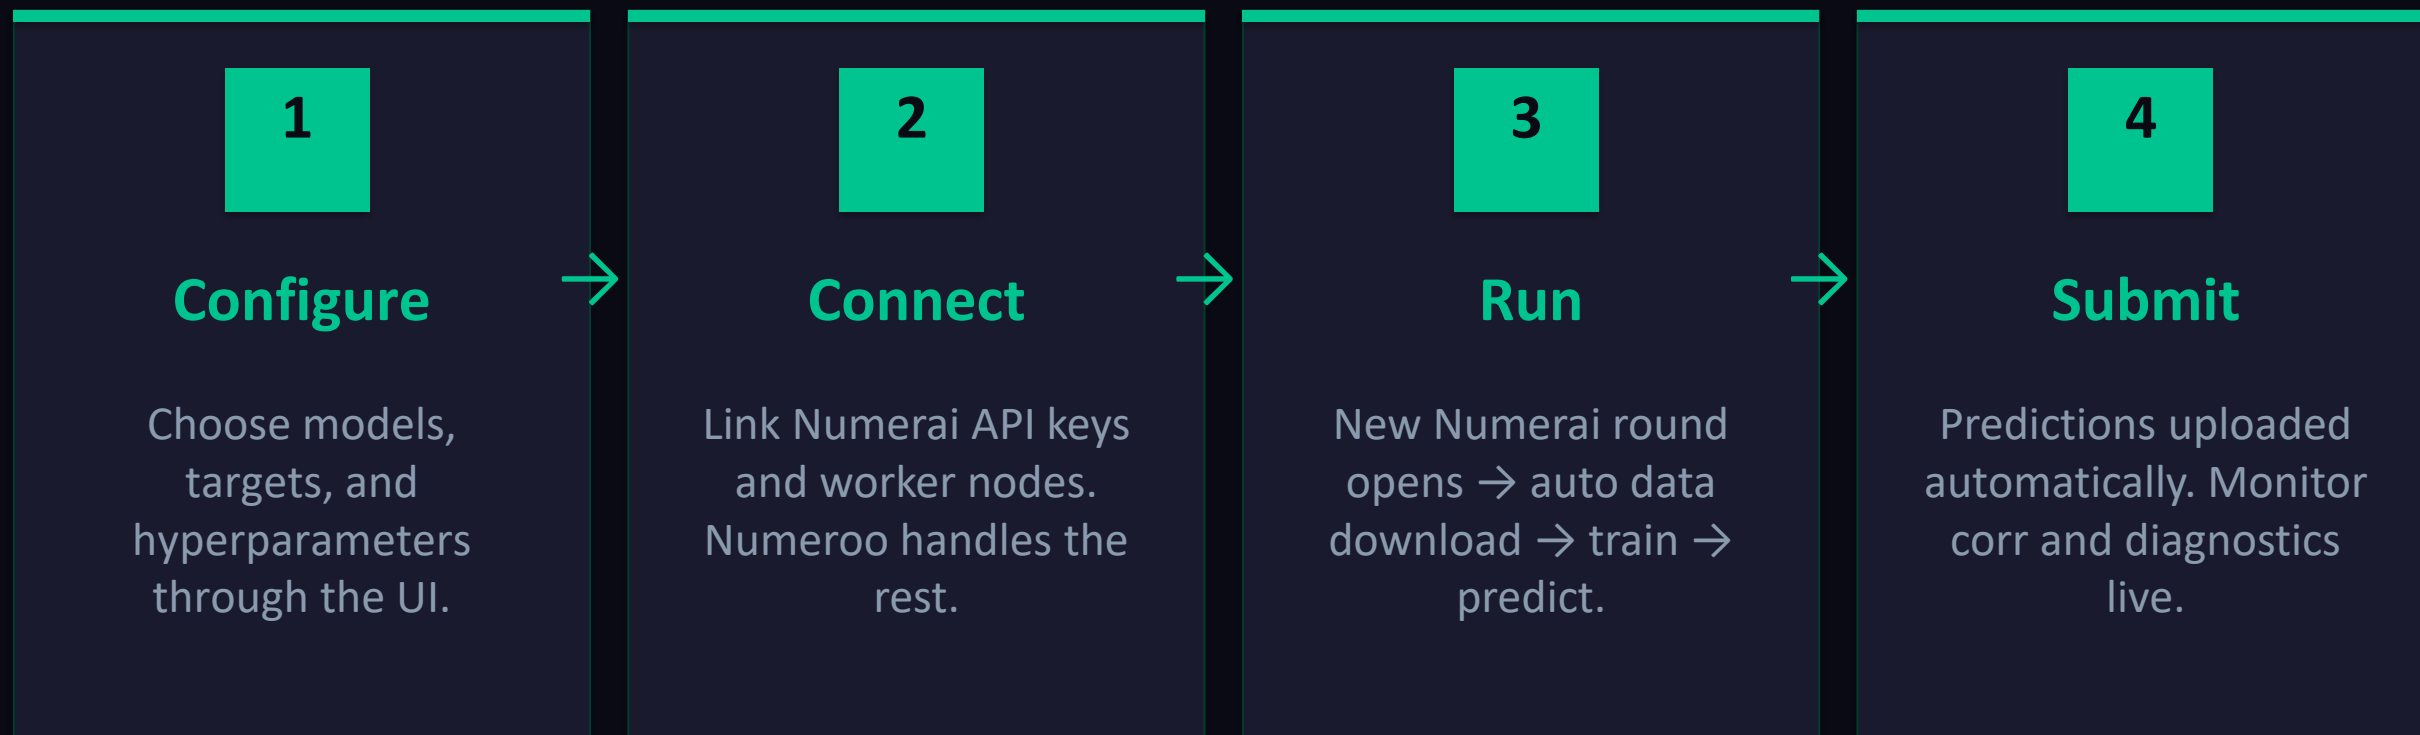

NumerBay is the community marketplace for Numerai signals and models.

- ▶ Setup models directly from your Numeroo dashboard
- ▶ List prediction signals for other participants to subscribe to
- ▶ Set your own pricing — one-off or recurring subscription
- ▶ Earn passive income from your alpha without managing customers
 - ▶ Track sales, subscribers, and revenue — all in one place

Your ML expertise becomes a product.
Numeroo is the factory.

How It Works

Four steps. Zero babysitting.

Every step after Configure is automatic — Numeroo runs on autopilot each new tournament round.

Key Features

Distributed Training

Parallel workers cut wall-clock training time dramatically.

Numerai Integration

Native API — auto data downloads, round detection, submissions.

Pipeline Automation

One-time setup runs every tournament round forever.

Real-time Monitoring

Live corr, sharpe, submission status across all models.

Model Management

Experiment versioning, Optuna tuning, best-performer promotion.

Smart Scheduling

Workers idle between rounds — compute only when a new round opens.

Why Numeroo?

✗ The Old Way

- ✗ Download data manually each week
- ✗ Write and maintain training scripts
- ✗ Set up cron jobs and cloud workers
- ✗ Debug failed or late submissions
- ✗ Repeat every single round — forever
- ✗ Worry about NMR price

✓ The Numeroo Way

- ✓ Log in once — data fetched automatically
- ✓ Configure models via a clean UI
- ✓ Workers distributed, managed for you
- ✓ Submissions happen on autopilot
- ✓ You focus on alpha, not infrastructure
- ✓ Increase NMR utility and value

You focus on alpha. Numeroo handles the infrastructure.

Roadmap

Where we are and where we're going.

1

CURRENT PHASE

Beta Testing & Release

- Core platform in beta with early users
- Stabilise distributed training pipeline
- Public release of v1.0

2

NEXT

NumerBay Support

- Integrate NumerBay marketplace
- Feature engineering pipeline
- DAG support (multi-datasource + ensembles)

3

PLANNED

Plugin Architecture

- User-authored custom plugins
- Expose plugin architecture & SDK
- Community plugin marketplace

4

FUTURE

Scale-Up

- Distributed compute at scale
- Multi-region worker orchestration
- Enterprise-grade reliability & SLAs

Thank You

Council of Elders

For GPU Compute Funding

Your support powers our distributed compute
infrastructure and accelerates innovation.

Ready to Scale Your Alpha?

Stop babysitting training scripts. Let Numeroo handle the compute.

Beginner

Sign up, connect API key, click Deploy.
First submission in under 10 minutes.

Intermediate

Import models, connect workers, automate your pipeline today.

Advanced

Full API, custom models, NumerBay listing — read the docs.
