

Numeroo

Numerai models in a few clicks

From your first click to your first submission

numeroo.bot

Numeroo

What is Numerai?

A hedge fund that trades on predictions from thousands of data scientists, across three competitions.

Classic

Stocks, with data Numerai supplies

- Predict stock returns from clean, obfuscated features
- A new round opens every day, Monday to Friday
- Stake NMR on your model and earn when it scores well

Signals

Stocks, with data you source

- Predict global stock returns from your own data
- Numerai provides only the ticker list and targets
- Rewards original signals the meta model lacks

Crypto

Crypto tokens, with data you source

- Predict token returns from features you collect
- Numerai provides the token list and historical targets
- Stake NMR; scored on accuracy and contribution to the meta model

The catch: taking part has meant Python skills, cloud infrastructure and manual work every round.

Numeroo

The Old Way vs. Numeroo

❌ The Old Way

- ✗ Learn Python and ML libraries first
- ✗ Download data, write training scripts
- ✗ Rent and run GPUs and cloud workers
- ✗ Schedule jobs so no round is missed
- ✗ Debug failed or late submissions
- ✗ Repeat it all, every round

✅ The Numeroo Way

- ✓ Pick a template in the browser
- ✓ Choose models and targets
- ✓ Train on GPU workers we manage
- ✓ Submit automatically every round
- ✓ Follow live logs, charts and ranks
- ✓ Spend your time on ideas, not upkeep

You focus on the model. Numeroo handles the rest.

Numeroo

What is Numeroo?

Build and submit Numerai models from your browser.

Templates, Not Code

Pick a pipeline template, then a model, a target and features.

30+ Models on GPU

LightGBM and more to come, trained on our GPU workers.

Honest Evaluation

Era-based splits keep a proper holdout, so scores aren't inflated.

Automatic Submissions

Predictions go to Numerai every round by webhook, with live logs.

Numeroo

How It Works

Four steps, then it runs itself every round.

1

Connect

Sign up and paste your Numerai API key.

2

Configure

Pick a template, a model, a target and features.

3

Train

Click train. GPU workers fit the model and score it on a holdout.

4

Submit

Predictions go to Numerai each round. Track them live.

After you click train, every step runs automatically, round after round.

Numeroo

Who It's For

Anyone who wants to take part in Numerai without the engineering.

Non-Coders

No code required

Who: finance professionals, NMR holders and curious newcomers

Train and submit a real Numerai model in minutes, all from the browser.

Get Started →

New Data Scientists

Learn on a working pipeline

Who: students and anyone starting out in ML or on Numerai

Compare models, targets and features side by side and see what each one scores.

Numeroo

Status and Roadmap

About 70% of the core platform is live today.

1

LIVE TODAY

Core Platform

- Templates in the browser
- 30+ models, GPU training
- Auto-submit every round
- Live logs and leaderboard

2

ALSO LIVE

Added Extras

- Era-based train/holdout splits
- Feature and target catalog
- Settings lock once a model is trained

3

NEXT

Faster Iteration

- Weekly dataset refresh (built, awaiting release)
- YAML pipeline editor
- Hyperparameter sweeps in the UI

4

PHASE 2

Credits & Sharing

- Credits: card, USDC or NMR
- Plugin gallery
- Sandboxed custom code
- Bring your own datasets

Numeroo

Why It Matters

More people modelling means a stronger Numerai and more NMR staked.

More Participants

Lower barriers bring new people into the tournament.

A Stronger Meta Model

Each new, original model adds signal the fund can trade on.

More NMR Staked

New participants stake NMR, adding demand for the token.

Shared Upside

As Numerai and NMR grow, every staker benefits.

Build Your First Model Today

Sign up, connect your Numerai key and click train.

🌱 Non-Coders

Pick a template and click train.
No code needed.

📚 Learners

Compare models and features
on a working pipeline.

🔔 Coming Soon

Numerai models in a few clicks

Numeroo

Thank You

Council of Elders

for supporting Numeroo's GPU compute

The GPU workers that train Numeroo models are funded with the Council's support.

Numeroo

Bonus: 5 NMR welcome credit

Risk-free staking credits for new Numerai users who join through Numeroo.

5 NMR

risk-free staking credits

5 NMR, not $5 USD

1. Set up your Numerai and Numeroo accounts
2. Email us the exact email address used for both accounts
3. Ensure you have made 1 week's of submissions
4. Numerai sends 5 NMR in staking credits to those accounts

The process is manual, so credits arrive after Numerai receives our list.
