- Yiedl(Rocket Capital) Since 2021
- MUSA Token?

I was not aware of Flock.io, but I have previously researched federated learning, and it is a field I am interested in.

もくもく作業会

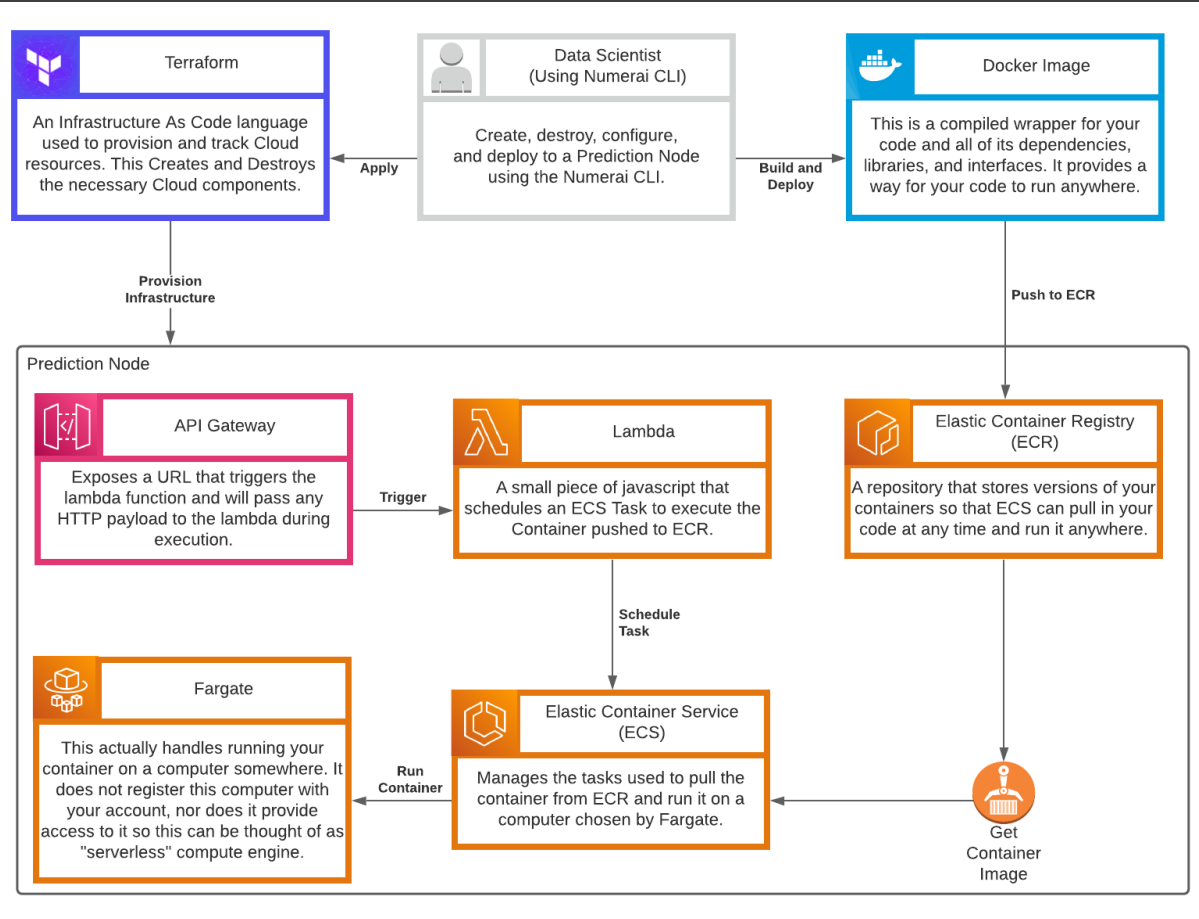

Focused Working Group

- 毎週水曜日に夜 21:00~
 - @Numerai Japan Discord
- それぞれ、やることを持ち寄って作業
- A session where participants bring their individual tasks and work quietly and independently.

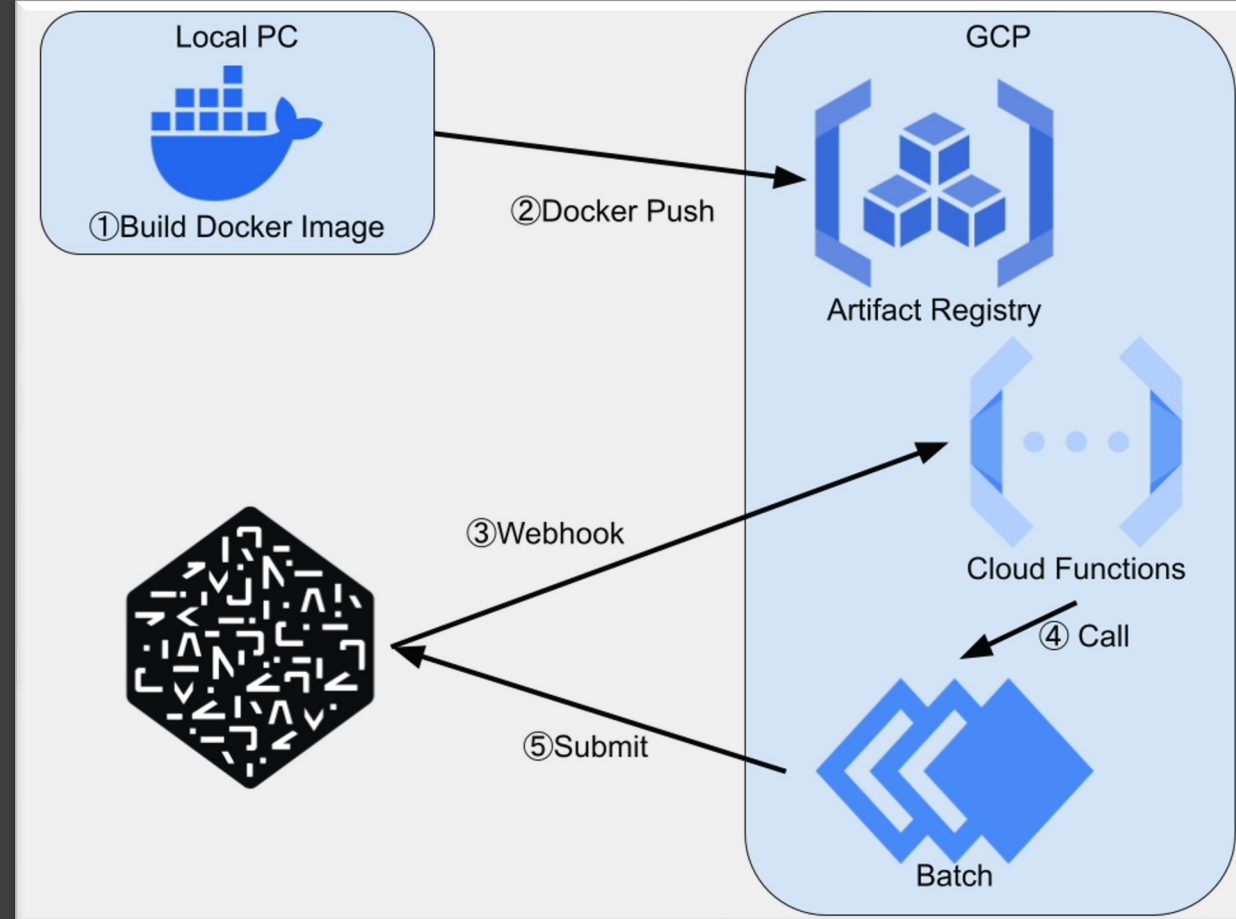

GCP Batch

- サーバーレスでコードを実行できる
 - 処理時だけサーバーが起動する
 - Can be executed serverlessly
- Numerai Cli だと Google Cloud Run を利用するため、メモリが最大 32G だがそれ以上に増やせる
 - GPUも指定できる(AWS Fargate)だとできない?
 - Has few server resource limitations
- Google Storage に学習済みモデルを置いておいて、そこから学習も可
 - Pre-trained models can also be utilized.

<https://github.com/numeraai/numeraai-cli>

GCP Batch

実際のコード

- 一部のNumeraiのモデルはコードで公開しています
- I have made some of my Numerai models public.
 - 実際に動かさなくても多少Numerai始める時の参考になるかも
 - It might be a useful reference when starting with Numerai, even if you don't actually run it.
- https://numer.ai/open_model_2
- <https://github.com/regonn/numerai-open-models>

GCP Batchの料金

(The cost of GCP Batch)

- Daily Submission で毎回10モデル程度 (RAM: 約100GB)動かしていて、月額1万円弱(1モデル 1,000円以下)
- Each model costs just under 1000 yen per month.

Tips

- Batchの処理が失敗に終わる
 - メモリオーバーの際には処理がそこで終わって失敗扱いになる
 - Please be careful of memory overflows.
- エラー処理や処理完了通知などはDiscordに通知で送る
 - Send notifications to Discord
- GPUはリソースが空しく実行されにくいため、時間制限のある Daily Submission はきついのかも?
 - There might not be enough GPU resources available on GCP?
- 複数モデルデプロイする場合はリージョン毎にCPU数制限があるので、リージョンは分散させるか、制限緩和申請が必要
 - Deploy models in multiple regions.

Thank you.

- Discordのもくもく作業会で引き続きオープンモデル作っているので、何かネタあったら教えてください
- I am continuing to create open models during the Discord focus work sessions, so if you have any ideas, please let me know.
